## // PROFESSIONAL SUMMARY

AI Engineering student with a junior digital production profile, focused on supporting creative teams through asset adaptation, mockups, basic web implementation, structured documentation, and AI-assisted workflows with human review. I combine web foundations, LLM prompting, structured logic, and QA checklists to organize repetitive production tasks, turn unclear requests into clearer tickets, and keep deliverables consistent and review-ready.

AI-ASSISTED WORKFLOW: CLEAR CONSTRAINTS, APPROVED SOURCES, HUMAN REVIEW.

## // WORK EXPERIENCE

2025 - PRESENT

### DIGITAL PRODUCTION & WEB SUPPORT

GRUPO STÖLL / BUENOS AIRES

- > Built and maintained the institutional website using HTML, CSS, JavaScript, and AI-assisted workflows.
- > Created and adapted SEO-oriented web sections, service pages, and digital content.
- > Structured product, material, and quotation data to reduce repetitive lookup and budget preparation tasks.
- > Used AI tools to support content structure, troubleshooting, workflow organization, and web implementation.
- > Organized incoming requests, customer information, and digital references into clearer follow-up tasks.
- > Worked with a production mindset: adapting content, checking consistency, reviewing details, and improving digital workflows.

2023 - 2024

### WEB & DIGITAL SUPPORT ASSISTANT

WUSSLER CONSTRUCCIONES S.R.L. / BUENOS AIRES

- > Supported web, digital, customer support, and commercial communication tasks.
- > Adapted and maintained digital content using HTML, CSS, JavaScript, and structured content workflows.
- > Managed customer inquiries related to construction services, quotations, and project details.
- > Organized commercial and technical information for clearer client-facing communication.
- > Supported basic internal technical issues and daily administrative/commercial workflows.
- > Helped review details, structure information, and keep outbound communication clear and organized.

## // EDUCATION

2025 - PRESENT

### B.S. ARTIFICIAL INTELLIGENCE ENGINEERING

UNIVERSIDAD DE PALERMO

Currently in second year. Focus on algorithms, structured logic, data foundations, and applied AI concepts.

## // PROJECT DEMOS

AI TICKET TRIAGE DEMO - Turns messy creative requests into structured Jira-style production tickets. DEMO · GITHUB

AI DESIGN OPS WORKFLOW - Shows copy variations, QA review, delivery summary, and responsive web implementation. DEMO · GITHUB

STRUCTURED QUOTATION LOGIC DEMO - Shows structured data logic for organizing categories, calculations, and review-ready summaries. DEMO · GITHUB
